

Dentures

Frequently Asked Questions

What are dentures?

Dentures are a removable framework that replace missing teeth. They can carry single or multiple teeth to suit a patient's needs. If you choose a denture to replace missing teeth, it will be custom-made to fit the size and shape of your mouth, making them feel and look as natural as possible.

Will people notice I'm wearing a denture?

Hampton Dental Care uses the most advanced digital design and manufacturing processes. This allows us to make your denture look and feel as real as possible, ensuring that you can smile with confidence knowing that people won't know you're wearing a denture.

What are the different types of denture materials?

The most common and cost-effective material is an acrylic. You may also choose high impact acrylic to help against breakage, cobalt chrome, or flexible dentures made from a nylon material. The type of material which is most suitable for you can be discussed with your dentist.

How long should my new dentures last?

The most common and cost-effective material is an acrylic. You may also choose high impact acrylic to help against breakage, cobalt chrome, or flexible dentures made from a nylon material. The type of material which is most suitable for you can be discussed with your dentist.

I already have a denture, but I'd like a new one. Can I have this done at Hampton Dental Care?

Yes, simply book a check-up appointment and your dentist can discuss this with you as part of your appointment.

Do you offer any denture guarantees?

Yes, Hampton Dental Care provides a guarantee for a new denture for twelve months after it is fitted by your Hampton dentist. Exclusions apply. Please see the Hampton Dental Care Terms & Conditions of Treatment document on our website for details.
